Jennifer:

I have been talking with Carrie Bradford about possible assistance. I am not sure the scope of work available under your agreement with them but this is what I am thinking:

- 1. Review available analytical data;**
- 2. Hand out a medical flyer about the site and how to get hold of TDSHS;**
- 3. Walk through the community and determine any concerns (health or other);**
- 4. Be available for public meetings (none scheduled yet).**

Anything else you can think of?

Thanks

Gary Moore
